Green Phosphate · V. Ammonium Phosphate (V-Phosphate) · Vital Urea · Fusion Potash · Vital Potash · Green Sulfur · V-Mag Essential · Cala-Mag V · Humi Grow · V-Transform · VL-Boron · VL-Micromix · Calcium Ammonium Nitrate · Urea · grey: general products, not VAN brands

Indicative programme. Built on best practice and the nutrient requirement of the crop, per acre. VAN prepares farm-specific plans against your soil analysis, yield target and the other variables that decide a rate: ask for one. Vital Urea is applied by drilling at sowing, side dressing or broadcasting, never by fertigation; the fertigation rows in the nitrogen group are general urea, a different material. Every VAN batch is tested before it ships; the batch number on the bag brings its certificate.

Rows as published on van.com.pk/crops/chili.html, 25 Oct 2026. Rates are per acre unless marked. Where a row says "Drill at sowing; broadcast if no drill", the drill is first by VAN's order of methods.
