CROP PLAN · PER ACRE

Sesame

Apr to May sowing | Main nutrients: sulfur, magnesium and potassium | 7 products · 5 stages

PRODUCT	RATE	HOW	GROUP
Land Preparation			
 **Green Phosphate** P_2O_5 32% · N 6% or Fusion Phosphate, your choice.	**1 bag of 50 kg**	Drill at sowing; broadcast if no drill	PHOSPHORUS
 **Green Sulfur** Sulfur 70%	**3 kg · 1 kg pack**	Drill at sowing; broadcast if no drill	SECONDARY NUTRIENT
 **Humi Grow** Humic acid 40% · K_2O 7%	**1 bag of 8 kg**	Drill at sowing; broadcast if no drill	SOIL AMENDMENT
Germination			
 **Vital Urea** N 32% · S 13%	**1 bag of 25 kg**	Side dressing/Broadcasting	NITROGEN
 **Vital Potash** NPK 11:0:44, coated with B	**½ of a 20 kg bag**	Fertigation	POTASH
 **Green Sulfur** Sulfur 70%	**2 kg · 1 kg pack**	Fertigation	SECONDARY NUTRIENT
Early Growth			
 **Vital Urea** N 32% · S 13%	**½ of a 25 kg bag**	Side dressing/Broadcasting	NITROGEN
 **VL-Boron** Boron 5%	**0.3 of a 1 L pack**	Spray	FOLIAR
 **VL-Micromix** Zn 5% · Fe 2% · Mn 2% · Cu 1% (w/v)	**1 pack of 1 L**	Spray	FOLIAR
Grand Growth			
No product is applied at this stage.			
Maturity			
No product is applied at this stage.			

Products in this plan: Green Phosphate | Vital Urea | Vital Potash | Green Sulfur | Humi Grow | VL-Boron | VL-Micromix

Where a plan row says “Drill at sowing; broadcast if no drill”, drill the fertiliser, and broadcast it only if no drill is available.

1. Drill at sowing (preferred)
The seed drill’s fertiliser box places the granule about 5 cm beside and below the seed row, never touching the seed.

2. Side dressing (second choice)
The granules are placed in a band beside the row, by hand or with a planter, at sowing or at the first irrigation, and covered with soil.

3. Broadcasting (least preferred)
The granules are spread over the field surface before the last ploughing or before an irrigation, and mixed into the soil.

Rates are per acre. Each rate names the size of its bag or pack, in kg or litres: “½ of a 25 kg bag” is 12.5 kg. Products named in grey are commodity inputs that VAN does not make.

About this plan. This crop plan is a general guide for a typical crop on a typical soil, and it does not replace a soil test. VAN can prepare a plan for your own farm from your soil analysis, your yield target and the other conditions of your field that affect how much fertiliser to apply. Ask for one on WhatsApp at +92 300 5003041 or at kisan@van.com.pk.

Lab report for each batch. VAN tests every batch before it ships. At www.van.com.pk/verify.html, you can type the batch number printed on any VAN bag and open the lab report for that batch.

This table is copied from the sesame plan at www.van.com.pk/crops/sesame.html as it stood on 10 Nov 2026.
